### - PCR -

TEST	RESULT	FLAG	REFERENCE	UNIT
<b>SARS-nCoV-19 PCR</b>	<b>Not Detected</b>			
<b>GENERAL COMMENTS:</b>  1) All results must be interpreted by a clinician or authorized health care professional with due consideration of contact exposure, clinical presentation and patient outcomes.  2) Due to the nature of the test, sample collection, storage and transportation will have an impact on the result.  3) The test is a molecular-based assay (RT-PCR). False positives and negatives may occur for various reasons.  4) All test results are forwarded to the designated public health authorities in accordance with statutory provisions and governmental reporting protocols.  <b>Interpretation of a NOT DETECTED result:</b>  A NOT DETECTED result means that SARS-CoV-2 (COVID-19) was not detected. Negative results do not necessarily exclude infection with SARS-CoV-2 (COVID-19) and should not be the sole basis of a patient management decision. Retesting is advised if clinically indicated.
